Hi Leah,

My comments highlighted in yellow below for the last 2 emails you sent.

Please see attached the 'possible look' for the tool tip. Can you confirm if the content inside the tool tip is possible, based on what we'd mocked? I'm not sure what the placeholder content is supposed to mean.

The email and review summary designs will be possible as mocked. Great

1. Could we have the "Would you recommend this item? Yes" to be kept on one line so it doesn't break? Also, there's too much of a gap between the label and answer. We can format it in one line but the answer will have a huge gap. The code structure of the custom questions is why the gap depends on the longest question. Ok let's keep as-is (2 line)
2. if the info of the label/answer needs to be stacked, can we have it similar to GF collective? Unfortunately, the "Overall Fit" is now a slider in the newest version of our widget, only the "recommended", "body type", and "height" will be stacked. Ok

**Bust Size:** C-D cup

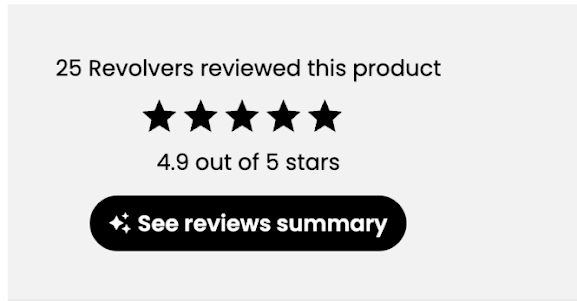

**Size Purchased:** S

Overall Fit **True to size**

3. for the slider, can we have it updated with rounded edges? is this optional for us to turn on/off? Yes, we can update it to round edges. And yes, you can enable/disable it inside their admin under the "Custom Questions" tab in the tool. Ok, let's go with rounded edges.

4. for the Write a Review button, would it be possible to have a similar pill button style like this one? So we main focus will be the content in the module. **Yes, that is possible.** Great, let's go with rounded edges.

#### **PDP Widget Modal Review Form (widget-mockup\_feedback (write a review form).png)**

1. Is it possible to have thumbnail + product details next to the star ratings (like email landing page)? **Only the product details can be displayed next to the stars.** Ok

#### **Email Landing Page (landing-page\_mockup\_feedback.png)**

1. Can we use the same UI as the PDP Widget Modal in terms of using push buttons? The *possible look mock* has radio buttons. **Unfortunately, this is not possible.** Ok

2. This template has the thumbnail and product description next to the stars, can this be used in the PDP Widget Modal? (question #1 in **PDP Widget Modal Review Form**) **Only product details can be displayed next to the stars.** Ok
