

Tomorrow Design

This screenshot shows the Tomorrow Design product review page. At the top, there's a navigation bar with tabs for 'Reviews' (highlighted), 'Questions', and '10'. Below the navigation is a search bar and a set of filters: Fit (Small, True To Size, Large), Color, Print, Length, and a dropdown for 'Sort by: Highest Rating'. There are also buttons for 'WRITE A REVIEW' and 'Print'. The main content area displays a list of reviews. Each review includes the reviewer's name, verification status, date, rating, title, and a short description. To the right of each review is a small profile picture and two thumbnail images of the dress. Below the reviews is a pagination bar showing pages 1 through 5.

Yotpo Screenshot

This screenshot shows the Yotpo product review page. At the top, there's a navigation bar with tabs for 'Reviews' (highlighted), 'Q&A', and '10'. Below the navigation is a search bar and a set of filters: Rating, With media, fabric, fit, size, dress, quality, length, material, and a dropdown for 'jackie'. There are also buttons for 'WRITE A REVIEW' and 'Show more'. The main content area displays a list of reviews. Each review includes the reviewer's name, verification status, date, rating, title, and a short description. To the right of each review is a small profile picture and two thumbnail images of the dress. Below the reviews is a pagination bar showing pages 1 through 5.

Annotations on the right side provide feedback on specific design elements:

- Could we style with the correct font (Teodor)
- Reduce Vertical space to match our design
- reduce size of stars, and adjust star shape to match design. this applies globally
- Match font and colors more closely to design. "inactive" part of bar should be #ABA9A8. "Just right" and "slightly large" text should be regular weight.
- Can we add a review fields appear in-module and (and push down the rest of the layout) instead of appearing in a modal?
- Can we move Write a Review CTA down to align with search bar? right now there is so much empty space to the left of it.
- Can we remove with media checkbox? Could we move Rating dropdown to be with the other dropdowns?
- Can you match styling of our design with the carat and carousel of tiles cut off?
- Can you match styling of our design to move dropdown carat closer to text, and fit sort by on same row?
- If you cannot move placement of reviews/questions tabs, could you match styling to our design?
- Can you match title font style to design? it looks too thick
- Height, Weight, Size purchased etc should be styled in medium weight
- Make Read More link Medium weight. It looks too heavy/bold
- "inactive" part of bar should be #ABA9A8. "Just right" and "slightly large" text should be regular weight.
- Can we remove this info?
- can we expand by default? no need for see more link
- What does this look like with images? Can images live in a third column like in the design
- Can we match pagination style to design?
